EXAMINER'S COMMENT AND STATEMENT OF ALLOWANCE

Response to Amendment

The amendment filed on 1/17/06 has been entered. Claims 1-23 have been amended. New claims 24-28 have been added. Claims 1-28 are pending.

Election/Restrictions

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 2-4, directed to the species of electronically detectable coding means and magnetically detectable coding means, are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

Allowable Subject Matter

Claims 1-28 are allowed in view of the amendment filed on 1/17/06.

The following is an examiner's statement of reasons for allowance: the cited prior art of record does not teach or fairly suggest an apparatus and corresponding method for positioning an optical component comprising, along with the other claimed features, a coding device having at least a first coding means with a first width and at least one second coding means with a second width, two detectors, wherein said two detectors detect the first coding means simultaneously when the receiving device is located in a retention position, and no more than one of the two detectors detects the second coding means when the receiving device is located in a region between two adjacent retention positions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
